A Full Range of Tapes for Every Print Application

Product Choice	3M™ Process Printing Tapes		3M™ Combination Printing Tapes					3M Tapes for Solids, Lines and Text	Thickness
	11 Series	12 Series	19 Series	13 Series	10 Series	15 Series	17 Series	18 Series	
	Soft Tape			Firm Tape					
The pictograms shown here represent the typical relationship between dots and solids for each tape type									
Easier plate removal Use with larger diameter print cylinder Use with thinner plates	E1120	E1220	E1920	E1320	E1020	E1520	E1720	E1820	0.50mm
	E1115	E1215	E1915	E1315	E1015	E1515	E1715	E1815	0.38mm
					E1040				1.00mm
					E1060				1.50mm
Higher plate side adhesion Use with smaller diameter print cylinder Better results with thicker plates	E1120H	E1220H	E1920H	E1320H	E1020H	E1520H	E1720H	E1820H	0.50mm
	E1115H	E1215H	E1915H	E1315H	E1015H	E1515H	E1715H	E1815H	0.38mm
	High quality process and screen work	Sharp dots, fine type and rich halftones at higher press speeds	Process and halftones predominate	Solids and halftones are equally important. Faster press speeds	Solids and halftones are equally important	Solids in combination with halftones / fine reverses at higher press speeds	Slightly more solids in combination of solid and halftones	Mostly solids, lines or text	

6 Cairn Court, Nerston Industrial Estate, East Kilbride, Scotland, G74 4NB
